FLY MANAGEMENT SERVICE

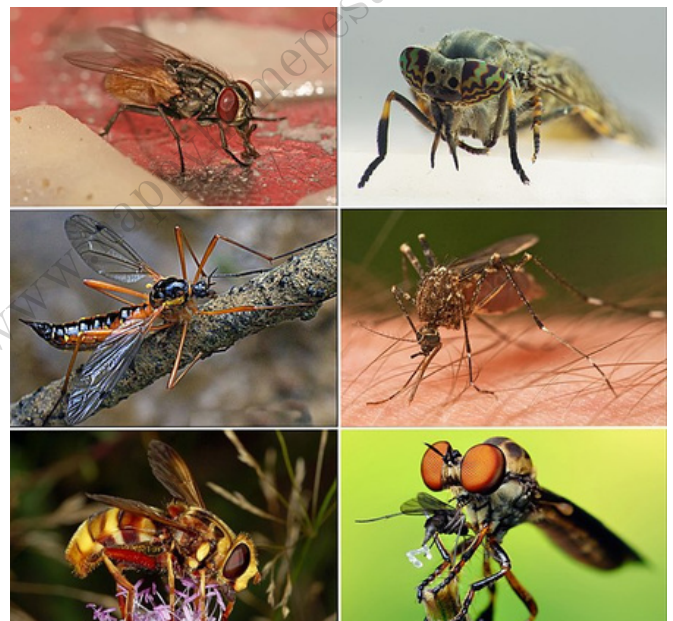

The fly is a nuisance to people around the world, primarily in places with a bad sanitary environment. Flies breed in any decaying, rotting organic matter like garbage, filth, excreta, manure etc. This contact subsequently leads to contamination of human food and transmission of disease.

Pre-Survey:

- Thorough inspection of site, this includes breeding site identification, sanitation, chemical, biological and other non-chemical methods.

Service offer:

- Annual Maintenance Contract

GENERAL PEST CONTROL

In addition to other services, Happy Home Pest Control Services also offer general pest management services to our esteemed customers as we are a well-known pest solution provider. Pest management services offered by us are provided when there is more than one pest, excluding termites, in a single building. In other words, our general pest management service is a hybrid of rodent management service, cockroach management service, Fly Management service, Mosquito management service etc.

Frequency of our pest management service is decided by our experts of sales personnel after the meticulous inspection of the site affected. Being a very client centric organization, we render this service of ours at the most moderate and matchless charges. This has brought to us a huge clientele, who is searching for the best pest solution provider in India. We are backed by a state-of-the-art infrastructure, comprising all the modern pest control Equipment's enabling us to render our services with fineness and brilliance.

SNAKE

MANAGEMENT SERVICE

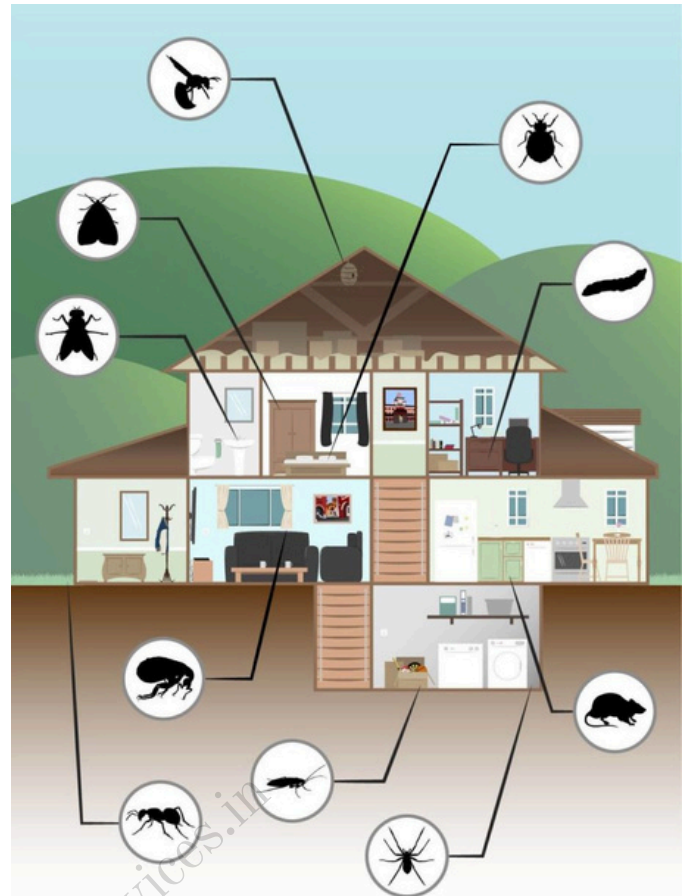

There are two types of snakes:-

- (i) Poisonous Snake
- (ii) Non-Poisonous Snake

What We Do

Knowing how to keep snakes away is a matter of knowing about the tools available to do so. With snakes there are really two ways to do it, repel them or use giant glue traps to capture and kill them.

Snake repellent is one of the greatest ways to make sure your home doesn't fall victim to these pests in we use Moth Balls, Sprays, Liquids, Powder Solutions. It is designed to repel all snakes, both poisonous and non-poisonous, and can be applied around the perimeter of your house or yard. This will give you the peace of mind knowing that any snakes that come near your home will quickly turn away and look for a more

SNAKE PREVENTION

- As snakes love tall grass, weeds, brush, and piles of debris, reducing this cover will make your yard much less appealing.
- Keep grass cut short and any bushes and shrubs especially close to building foundations, Store
- Rewound away from homes and buildings. Control rodents which will then reduce the need for snakes to be around your property.

PRO-GUARD SERVICE

This service is designed to deal with pests that infest the surfaces of warehouses and storage facilities.
